

Junior Data Quality Specialist

The position

We are looking for a Junior Data Quality Specialist to come and reinforce our Quality Assurance team. Your responsibilities will be:

- Analyze and understand the data we process.
- Review and propose changes in the requirements.
- Make sure the definitions are observed: data layouts, data versioning rules, datasets' naming convention, flow from dev to prod.
- Create test plans from the acceptance criteria and run them every time is needed, confirming that the system complies with the expected outcome.
- Define automated controls (Data Quality Controls (DQC) / Data Analysis Checks (DAC)) per dataset to guarantee that every piece of data that lands into our system and is delivered is properly treated and processed.
- Design data quality controls' dashboards, in order to monitor the status of the datasets and controlling key metrics, previously defined and extracted with the automated controls.
- Support data engineers and data leads on tasks related to the data pipeline testing.
- Support the data release processes.

Personal skills and experience

- Experience is not mandatory.
- We are looking for high-level English speakers.
- Knowledge of agile methodologies. Understand the priorities and the sprint goals of the team.
- You are a proactive team player, a good communicator and you pay attention to details.
- You are curious about data

You have worked with:

- Code: SQL, Git.
- BI tools: Dremio, Athena, AWS, Snowflake.
- Visualization: PowerBI, Excel.
- Data pipelines: Jenkins, GitLab.
- Management tools: Jira, Confluence.

We offer

- Full time, indefinite contract.
- Be part of a fun, successful yet stable, young and exciting company.
- Nice and dynamic working environment.
- Flexible working hours.

- ForwardKeys Fridays: four working Fridays off per year.
- Remote work.
- Wellbeing activities: Yoga and Osteopath.
- English classes.

Company story

ForwardKeys is an innovative travel analytics company. It was established in 2010 when the founders realised that the air reservation data used by airlines could serve every industry with an interest in global travellers. Since then, we have built several online platforms through which our clients monitor and qualify traveller flows, map global demand and forecast travel trends. Our team now comprises over 90 people and continues to grow – and we are always looking to develop new datasets and products to help our clients understand the travel landscape.

Company culture

The working environment at ForwardKeys is international, challenging and flexible: International because our employees come (and work) from all around the world, just like our clients. Challenging is making the transition from a start-up to a bigger company, and everything that entails – from developing and selling new products to seeking and seizing new opportunities. Flexible means we understand that doing your job well is more important than being in the office from 9 to 6. To ensure everyone is working towards the same goals, we have biannual company weeks during which we make sure to have fun.

The job location

You will have the possibility to partially work remotely from your most convenient location. Nevertheless, your presence in our Headquarters in Valencia, Spain will be linked to specific purposes, what we call “Key moments that matter.” At times when it is valuable to bring people together, impacting the commitment, stickiness, productivity, and desired outcomes.

How to apply

If you think you fit our company culture and have what it takes to contribute towards ForwardKeys’ continued success, please send an email to jobs@forwardkeys.com (mentioning the job title in the subject line) or apply by filling in the form.
